WELCOME TO OUR AWARD WINNING CLINIC

Thank you for choosing our clinic that has been established for over 20 years.

We value our patients and our mission is to serve you with the highest standard of clinical care and return you to health in as short of period of time as possible.

All our chiropractors are legally registered with the General Chiropractic Council, and some are Fellows of the Royal College of Chiropractors.

*Our Clinic of Excellence
Winning the Award 2009-2020*

Our Clinic is wheelchair friendly, with a ramp and handrails to make it accessible for those less able. We have a large car park which brings you to the front door so you never have far to walk.

Often people come to us when they have had their problem for a long time, or as a last resort. If you know this to be true then you also know that it will take more visits for you to heal properly.

Know that you are in safe hands with us because we have treated thousands of patients successfully. Our practice grows with referrals from satisfied patients. Have a look at our website reviews on bournemouthchiropracticclinic.co.uk.

Chiropractors deal with the diagnosis, treatment and the prevention of mechanical disorders of the musculoskeletal system.

There is an emphasis on alleviating discomfort arising from accidents, stress, lack of exercise, poor posture, occupation and everyday lifting.

Chiropractors take a holistic approach to your health and wellbeing. This means that they consider your symptoms in the context of your full medical history, your lifestyle, occupation and personal circumstances.

Your chiropractor will give you advice on exercise, nutrition and lifestyle. Part of your treatment could involve massage, soft tissue therapy, joint mobilisation, exercise or rehabilitation exercise programmes.

Your progress will be reviewed regularly and you will be asked for informed consent before your examination and treatment.
